Laith Shams Ali
Computer Science student

A fourth-year **Computer Science** student passionate about **software development**, I enjoy working in a team and learning from people with different experiences. In addition, I like to work on challenging projects where I can learn something new or improve my skills, and solving problems creatively while working with new technologies is a relish for me. Though I'm better at **back-end development** than **front-end**, I aim to become a **full-stack web developer**. I believe combining the knowledge of front-end and back-end development would help me broaden my horizons within a team or as a future team leader.
